

ASCEND ONLINE Fleets

General Aviation

The industry's leading insurers, brokers, operators and financiers depend on Ascend Online's General Aviation data to achieve an accurate understanding of the dynamic General Aviation (GA) market.

Ascend Online incorporates over four decades of comprehensive GA data. Business jet entries range from the very first Learjets to the latest Gulfstreams. Every manufacturer, type and airframe is included. This rich data source also delivers the most up-to-date information on business turboprops and turbine helicopters, enabling your business to make decisions quickly and with confidence.

No other system delivers Ascend's unique combination of GA fleet, transaction and insurance loss data. Updated daily by Ascend's dedicated team of experienced data analysts, information is accessible online, 365 days a year. Our commitment to quality and accuracy allows you to transform the very latest GA information in to profitable market insight.

"We integrate the data into the pricing and underwriting of our aviation business line and have found both the data and level of customer service to be excellent."

Adrian McGarva
Chief Actuary
Glacier Reinsurance AG

Discover

- Over 60,000 General Aviation aircraft
- Transaction details including orders, sales and deliveries
