SPACE Review

The space industry's
leading online commentary
and analysis tool

Unique online commentary and analysis on available launch systems and spacecraft bus designs, plus insight into future demand, requirements and capabilities.

Space Review offers information from technical specifications, historical information to reliability trend analysis, providing a valuable and easy accessible insight into a complex industry sector.

Discover

- Detailed vehicle, satellite and operator information
- Profiles of launch providers
- Reliability trends
- List of major anomalies
- List of space insurance losses
- Maiden flight records and in-orbit failures
- Expert analysis and commentary

Key features

- **Focus** – on commercial satellites
- **Forecasting** – Five-year satellite and launch demand forecast plus separate forecasts for commercial, civil and military sectors
- **Historical data** – Launchers and satellite launches plus technical information on current launch vehicles and major satellite types
- **Unlimited Access** – Online single-user and multi-user access

"This is undoubtedly the most authoritative and independent information source one may find (and trust) when it comes to gauging risk and gaining rewards in space."

Pierre Valenti, EADS Astrium

An invaluable information tool for the space sector

Benefiting from Space Review

Insurers & brokers

depend on Space Review to:

- Analyse reliability trends
- Predict premium levels and flight rates
- Provide insurance burn rate analysis
- Provide technical information on major satellite bus and launch vehicles
- Detail generic launch failures

Satellite operators & owners

depend on Space Review to:

- Check on reliability of launch vehicles
- Analyse satellite reliability and generic faults before ordering
- Assess global demand for satellite services
- Aid negotiations with insurers
- Predict future growth areas

Satellite manufacturers

depend on Space Review to:

- Develop and shape new product development
- Track reliability of competitor products
- Predict future demand for products

Banks, financiers & consultants

depend on Space Review to:

- Evaluate risk-return profiles
- Analyse industry trends and forecast demand
- Give an overview of a company and assets

Launch provider/pad operators

depend on Space Review to:

- Assess future launch demand
- Monitor the reliability and market share of competitors
- Assess future sales opportunities

Government/regulatory bodies/space agencies

depend on Space Review to:

- Analyse satellite reliability
- Analyse safety and reliability of launch vehicles
- Predict future demand for launch and satellite services

Better data, better decisions
