Asset and portfolio monitoring and assessment

Don't leave risk to chance: multi-million dollar assets deserve informed decisions

Aircraft and engine portfolios are multi-million dollar investments and monitoring their value is essential for all stakeholders.

Airline investors, operating and financial lessors, aircraft-backed securities and tax-related aircraft leases require specialist information for making real-time decisions to analyse the performance of aircraft and engine portfolios.

Ascend delivers a proven range of expert services to effectively monitor the value of your portfolio and help you make critical decisions with confidence.

How Ascend can help your business

Ascend's proprietary online data services, specifically developed for monitoring and evaluating aircraft and engine portfolios are further linked to a unique suite of tools taking asset analysis to the greatest level of detail. All value changes are reflected instantaneously and access is unrestricted.

Our team of experts is on hand to provide even greater insight into the aviation markets and behaviours of different classes of assets. Our knowledge and experience brings a new depth and range to your understanding of your valuable assets.
